### Vaccinations

**Nursing program:**

Based on the CDC Recommended Immunizations for Health-Care Personnel (HCP), all HCPs must submit documentation of immunization to Hepatitis B (*series of three doses with anti-HBs serologic testing 1-2 months after dose #3*), proof of immunity to Hepatitis B, or a signed declination; Measles, Mumps, Rubella (MMR); Varicella (chickenpox); and Tetanus, include Influenza (yearly), Hepatitis A, and Pneumonia. For some individuals, a titer test will be indicated vs. vaccinations. Titer tests showing immunity to listed pathogens are acceptable. Titer tests showing a negative response require appropriate immunizations and follow-up titers must be completed and submitted. Diphtheria and Pertussis (booster every 10 years) are highly recommended immunizations for HCPs. If one or more of the listed immunizations are contraindicated, documentation must be submitted clearly identifying the reason(s). Titer tests showing immunity to listed pathogens are acceptable. Titer tests showing a negative response require appropriate immunizations and follow-up titers must be submitted. Diphtheria and Pertussis (booster every 10 years) are highly recommended immunizations for HCPs. If one or more of the listed immunizations are contraindicated, documentation must be submitted clearly identifying the reason(s). Clinical laboratory reports with the facility stamp and a medical doctor's signature is required. See the Nursing Student Handbook for additional information.

For more information on immunizations and vaccines, visit the Center for Disease Control and Prevention website at [http://www.cdc.gov/vaccines/](http://www.cdc.gov/vaccines/).

**Dental Hygiene program:**

Enrolled students are exposed to bloodborne pathogens and infectious diseases. These include but are not limited to pathogenic microorganisms present in human blood and can cause diseases such as Hepatitis (HBV), Herpes, Tuberculosis, and HIV. Students are required to treat all patients assigned and as a result, the potential exists for transmission of bloodborne and other infectious diseases during patient care services. West Coast University is committed to protecting the rights of individuals who may have a bloodborne infectious disease. The purpose of the program Bloodborne Pathogen Policy (BPP) and Exposure Control Plan (ECP) is to minimize the risk of transmission of bloodborne pathogens, as well as, minimize the risk to other environmental hazards. The dental hygiene program complies with all local, state and federal infection control policies including the application of Standard Precautions as stipulated by current CDC (Centers for Disease Control) Guidelines and OSHA (Occupational Safety and Health Administration) Standards. Policies on bloodborne and infectious diseases are available for applicants by contacting the Dean of Dental Hygiene.

Based on the CDC Recommended Immunizations for Health-Care Personnel (HCP), all HCP students must submit documentation of immunization to Hepatitis B (*series of three doses with anti-HBs serologic testing 1-2 months after dose #3*), proof of immunity to Hepatitis B, or a signed declination; Measles, Mumps, Rubella (MMR); Varicella (chickenpox); and Tetanus, diphtheria, pertussis (booster every 10 years). Highly recommended immunizations for the HCP students include Influenza (yearly), Hepatitis A, and Pneumonia. For some individuals, a titer test will be indicated vs. vaccinations. Titer tests showing immunity to listed pathogens are acceptable. Titer tests showing a negative response require appropriate immunizations and follow-up titers must be submitted. If one or more of the listed immunizations are contraindicated, documentation must be submitted clearly identifying the reason(s). Clinical laboratory reports with facility stamp and medical doctor's signature are required.

The CDC Guidelines for Preventing the Transmission of *Mycobacterium tuberculosis* in Health-Care Settings are intended to protect the HCP student and patients. The TB screening program consists of two major components: (1) baseline single test for *M. tuberculosis* infection and (2) serial testing/screening for *M. tuberculosis* infection. The HCP student must have a baseline single test followed by serial skin testing or blood testing every year. If the HCP student has a baseline positive result or has previously had a positive result, a chest radiograph must be completed to exclude a diagnosis of TB disease. Thereafter, every year the HCP student must receive a symptom screen. Documentation of positive skin or blood test and negative chest x-ray must be submitted.

**ENROLLMENT:** To provide context for the Cohort Default Rate (CDR) data we include enrollment data (students enrolled at any time during the year) and a corresponding percentage (borrowers entering repayment divided by that enrollment figure). While there is no direct relationship between the timing of when a borrower entered repayment (October 1 through September 30) and any particular enrollment year, for the purpose of these data, we have chosen to use the academic year ending on the June 30 prior to the beginning of the cohort year (e.g., FY 2012 CDR Year will use 2010-2011 enrollment).
In order to register to vote in the state of California, please use the following website: [http://www.sos.ca.gov/elections/voter-registration/](http://www.sos.ca.gov/elections/voter-registration/).

In California, the deadline to register to vote for any election is 15 days before Election Day, deadlines for upcoming elections can be found below:
